## Vocabulary Words Grades 6–8

---

*These words and phrases were chosen because either they are terms within the assessed standards or they are cited in the benchmark clarification/content limits in the reading test item and performance task specifications.*

*Because Language Arts is a spiraling curriculum, many of these vocabulary words will be the same across grade clusters. It is the difficulty level of the text, the complexity of the assignment, and the degree of scaffolding (student independence) which changes as a student moves from grade-level to grade level.*
